International renowned expert, Dr. Howard Goodfellow, receives award for 30 years of long standing service in the area of Industrial Ventilation

Mississauga, November 27, 2015 – The *11th International Conference on Industrial Ventilation* was recently held in Shanghai, China, October 26-28. This gathering saw leading scientific experts from more than fourteen countries come together to discuss pertinent topics and to share the latest in scientific research in ventilation related issues. During the event, conference organizers presented Dr. Goodfellow, the founder of the original Conference on Industrial Ventilation in 1985, with a prestigious award for his 30 years of long standing contribution to the area of Ventilation on a global scale. The award was presented to Dr. Goodfellow by Professor Zhang of Tongji University, the host venue for the conference.

Dr. Goodfellow serves as a Director on the Board at Tenova Goodfellow Inc., and is an Adjunct Professor with the Department of Chemical Engineering, University of Toronto. As a co-chair of Vent 2015, his Opening Address outlined the challenges and future opportunities to develop a collaborative global network which would be multi-disciplinary (sensors, advanced mathematics, environmental occupational health & safety) based on global cutting edge science and technology.

As part of the celebratory proceedings, Dr. Goodfellow was also invited to present the Plenary Address *“Industrial Ventilation for Contaminant Control – Future Directions.”* With more than 210 in attendance, the Plenary Address recapped the historical beginnings of Industrial Ventilation and how it has grown to embrace new technologies to meet the design objectives and challenges of the ventilation community for the 21st century. Industrial Ventilation is a key technology component to develop solutions for energy efficiency and climate change initiatives for global markets.

About Tenova

Tenova is a worldwide supplier of advanced technologies, products and engineering services for the metals and mining industries providing innovative, integrated solutions for complete process areas. Tenova's network companies operate in 26 countries on 5 continents with more than 4,000 people. As part of Tenova's global network, Tenova Goodfellow Inc. is specialized and leading in the design and supply of process control technology for the EAF and BOF markets.
